Developer

📱 +90 551 234 8722 @ dhyazgan@gmail.com
📍 Istanbul, Turkey

In the past, I have worked on web and mobile application programming. Currently, I am interested in mobile app development, making an effort to learn frameworks of new technologies to the best of my ability. I am someone who is inclined towards self-improvement and teamwork. I enjoy traveling, camping, and engaging in sports.

▤ SKILLS

Programming	Dart, Java, HTML, CSS , JavaScript.
Frameworks	Flutter, Spring Boot, Bootstrap.
Database	Firebase Firestore, Firebase Realtime, MySQL, Shared Preferences.
Development Tools	VsCode, Android Studio, IntelliJ Idea, Eclipse , Git.
Grafic	Figma, Photoshop, Vegas Pro, After Effects.
Others	State Managements , Architecture Patterns, JIRA, BitBucket, Flavor.

💼 EXPERIENCES

Now
August 2023

Flutter Developer, MOBILIST,
At Mobilist, I spearheaded key roles in diverse mobile app projects, notably ParaKolay for hotels. I led the development of the Merchant App and contributed to the core ParaKolay platform. I supported international projects, delivering the Amber app for Qatar and aiding the ongoing development of the EU-backed Alina App in Germany. I worked on projects for Borusan Kerim Çelik and İnci Akü, utilizing current technologies. I employed advanced state management techniques, utilizing BLoC and Riverpod.
- › ParaKolay and ParaKolay Merchant and Borusan Kerim Çelik applications have been completed.
- › The application designs were completely revamped.
- › Web integration was implemented for various Flutter applications.
- › Both BLoC and Riverpod state management methods were integrated into various applications.

Flutter | Dart | Cross Platform | Git | MVVM | BLoC State Management | Riverpod State Management | VsCode | Firebase | JIRA | Rest API

August 2022
July 2022

Mobile Developer (Intern), TURKISH AIRLINES, TURKISH TECHNIC,
I completed my internship at Cornea Aero Systems, one of the Turkish Technic companies at Sabiha Gökçen Airport.
- › The given page models have been completed.
- › The in-app bugs have been tested.

Java | Android Studio | Firebase | Rest API

August 2021
June 2021

Front End Developer (Intern), İSTANBUL YAŞATIR, The Istanbul Metropolitan Municipality
I developed the front end of the Istanbul Sustains and Istanbul Card websites at Istanbul Metropolitan Municipality.

HTML | CSS | JavaScript | Rest API

🎓 VOLUNTEER EXPERIENCE

2022   I am a board member of the HALIC C.O.D.E. club. I am responsible for club organization management and graphic design. I keep in touch with the guests we invite, ensuring a smooth and well-organized event.

🎓 EDUCATION

2023   **Halic University**, Computer Engineering
2018   **Erdem Bayazıt High School**

2020	KOSGEB Advanced Entrepreneurship Certificate

💻 PROJECTS

BORUSAN KERIM ÇELIK   2024 - NOW

🔗   The Borusan Kerim Çelik application is a project that brings the current Kerim Çelik pipe sales website to a mobile platform. Within the app, users can participate in auctions by placing bids in the cart, purchase products directly using the "buy now" option, and mark products and their storage locations as favorites. The project includes both admin and customer interfaces. With a practical and user-friendly UI design, it offers users a convenient service.

PARAKOLAY MERCHANT   2023 - NOW

🔗   Parakolay Merchant is an application designed for employees of the Parakolay company. The mobile application was completed by pulling endpoints from the existing web application. A more user-friendly and modern interface was added compared to the web version. It includes features such as link payment, money withdrawal, and QR payment.

PARAKOLAY   2023 - NOW

🔗 Parakolay Play Store   🔗 Parakolay IOS   🔗 Parakolay Web

User-friendly virtual banking application. Users can use ParaKolay as a secure transfer option for online transactions. The application also features QR code payments for sending and receiving money.

`Flutter` `Dart` `MVVM Architecture` `Cross Platform` `Rest API` `Visual Studio Code` `Git` `JIRA` `BitBucket` `Web Integration` `BLoC State Management`

QRSUITE   2023

🔗   This application, designed to facilitate easier service for small businesses' customers, includes IBAN, map, contact, and gallery pages. Thanks to its user-friendly interface, customers can easily access the information about the business.

`Flutter` `Dart` `Firebase` `Google Directions API` `Visual Studio Code`

FITLOCK   2022

🔗 FITLOCK Play Store

FitLock is a diet application created with the guidance of a dietitian. It offers personalized calorie calculations, diet menus, workout programs, and a water tracking feature.

`Java` `Android Studio` `Firebase` `Firebase Authentication`

GOALTRACK   2021

🔗   A note-taking application where users write their expectations for the new year, and upon completion, they achieve animated success. It includes a dark theme for user preference.
